

Certificate in Building Control Studies

2-week Course

The training programme is being delivered as a result of member, employer and industry demands.

It is a comprehensive programme for individuals looking for an introduction to or a refreshment on the legislative and technical elements of Building Control and their application.

Programme Aims

To provide an up-to-date overview of the legislative controls that govern the design, construction maintenance and the use of property within the Built Environment.

Programme

Week 1: Legal Controls

- Building Control Systems
- Building Control, the Regulations and their delivery
- Building Control and Related Provisions
- Review and application of Approved Documents linked to the examination of plans
 - Part L – Conservation of Fuel and Power
 - Part A – Structure
 - Part C – Site Preparation and Resistance to Moisture
 - Part D – Toxic Substances

Week 2: Technical Controls

- The review and application of approved documents linked to the examination of plans
 - Part G – Sanitation, Hot Water and Water Efficiency
 - Part H – Drainage and Waste Disposal
 - Part E – Resistance to the Passage of Sound
 - Part J – Heat Producing Appliances
 - Part P – Electrical Safety – Dwellings
 - Part K – Protection from Falling, Collision and Impacts
 - Part M – Access and Facilities for Disabled People
 - Part N – Glazing: Safety in relation to Impact, Opening and Cleaning
 - Part F – Ventilation

Candidates are also required to bring pens, scale rules, calculators, Approved Documents and other support material for use during the course.

Course Assessment

The completed project is to be submitted within one month of issue. Satisfactory completion of the full programme and the assessment will lead to the ABE Certificate in Building Control Studies.
